

Purchasing Policy

Coca-Cola Amatil is committed to understanding and minimising any adverse environmental impacts of our beverage manufacturing activities.

We do this while continuing to meet the expectations of our consumers and customers for quality and service, whilst providing a safe working environment for employees.

As part of our commitment, we seek to identify and implement ways to improve the efficiency with which we use resources, including packaging and other materials.

To this end we will:

- Give preference throughout our business to purchasing products and materials made of recycled content if these products and material satisfy current performance, safety, regulatory and cost requirements.
- Consider substitution of current products and materials with recyclable items if the recyclable substitutes satisfy our performance, safety, quality, regulatory and cost criteria.
- Require our suppliers to specify the volume of recycled content in products and materials to be supplied
- Encourage our suppliers and bottling operations to actively recycle all plant waste to minimise environmental impacts of these materials
- Strive to increase the volume of recycled content of products and materials used to help create sustainable end markets for recyclate
- Work with others in industry and the community to ensure our consumers have access to convenient collection systems for the recovery of used beverage containers for recycling.
